## Precipette™ SINGLE-CHANNEL ADJUSTABLE VOLUME PIPETTE

- Dispensing volume range of 0.1µL-10ml
- Color codes on top to easily identify different volume ranges
- Large 4-digit volume display offers high display accuracy of up to 0.002µl
- Low operating force required for control button avoids repetitive strain injuries
- Ergonomically positioned ejector button with low plunger force for easy tip ejection
- Centrally placed view window makes volume reading and adjustment easy for both left and right-handers
- Elastic tip cone ensures perfect seal with tips and allows for easy tip removal
- Each pipette is calibrated in accordance with ISO8655 and shipped with individual test certificates
- Ergonomic design provides good hand grip, and combined with ultra-light weight offers fatigue-free pipetting
- Durable material offers excellent temperature and chemical resistance
- The lower section can be autoclaved
- Easy to dismantle, and maintain
- Comes with tool for easy calibration

## PIPETTE STAND

- Compact design; Occupies less bench space
- Stable and reliable structure
- Compatible with all major pipette brands

## PIPETTE PUMP

- One-handed precise aspirating and dispensing
- 2mL in blue, 10mL in green and 25mL in red are available
- Resistant to acids and alkalis
- Easy to disassemble for cleaning

## PIPETTE CONTROLLER

- Works with 0.1-100mL graduated glass and plastic pipettes
- Filling and delivery are easily controlled with a small sensitive lever
- With integral and replaceable filter
- Precise pipetting control
- Blue, Green, Red, Yellow and black are available

## 3mL Transfer Pipette

These 3ml disposable pipettes are great choice to transfer all kinds of liquid. They are pliable and easy to use. Clear mark of 1ml, 2ml, 3ml for reading accurately. They are widely used in laboratories, chemistry, microbiology, personal beauty, essential oils, perfume, DIY mixtures.

- **High Safety & Quality**

Made of Polyethylene, non-toxic and harmless

- **Easy to use**

Extremely pliable and strong suction provides easy transfer

- **Graduated**

Graduated by 1ml, 2ml, 3ml on the clear disposable pipette, which can accurately measure the corresponding volume of liquid; the increment is 1ml

- **Multiple Applications**

The disposable pipette is a great choice for lab science, essential oil transfer, DIY beauty products, art projects, lip balm making, crafts, aromatherapy blends, scale model paints and etc.

# Reagent Bottle

- Made from Borosilicate Glass 3.3, offers high hardness & transparency
- The Blue caps made of PP, are autoclavable at 140°C
- Easy-to-Read Graduations in White
- Caps are made of PP, and are autoclavable up to 140°C
- Replaceable pouring ring (autoclavable) for drip-free pouring
- Large labelling area for easy marking
- Available in different volumes

- L-shaped cell spreaders are ideal for spreading bacterial cultures evenly
- The L-shape allows application on the entire Petri dish or plate surface
- Smooth spreading surface with slight upward return reduces the risk of damaging agar sample
- Spreaders are manufactured of high impact PS.

## T-shaped Cell Spreader / Triangle Shaped Cell Spreader

- Designed for spreading and dispersing liquids across the surface of agar culture plates
- Used for performing bacterial CFU plate counts on water, milk, urine and other liquid samples
- These T-Shaped Spreaders have all smooth rounded surfaces to prevent any cutting or gouging of agar during inoculation of culture plates
- The T-Shape design ensures even pressure is applied across the entire length of the T-bar in contact with the agar surface
- Many colors available upon request

- DNase/RNase free, and free of PCR inhibitors
- non-skirted, semi-skirted, skirted options available
- Standard Profile (0.2 ml) & Low Profile (0.1 ml)
- Designed for use in all major Thermal Cyclers (ABI & Roche specific options also available)
- Comes with alphanumeric grid or alphanumeric coding in black

**Please Note: Non-sterile strips. Can do radiation sterilization if needed, but strip will turn brown**

## Syringe Filters

Our syringe filters offer outstanding microfiltration for applications including HPLC, life science applications like filtration of cell and tissue culture media, pharmaceuticals, etc. Sterile syringe filters are typically used in life science applications, and non-sterile syringe filters have wide application in analytical chemistry including for filtration, sample preparation, and protecting analytical equipment from particle contamination

### PES (Polyether Sulfone) Syringe Filters

- Hydrophilic membrane offers high flow rate, has very low protein binding, and is ideal for filtration of biological samples
- These sterile syringe filters come individually wrapped to ensure optimal performance without contamination.

### PTFE (Polytetrafluoroethylene) Syringe Filters

- Hydrophobic membrane offers high flow rate and is chemically resistant to all solvents, acids & bases
- These syringe filters feature low extractables, and can handle high-temperature liquids

## Microscope Slides & Cover

The microscope slides made of high-transparency optical glass, good for ordinary microscopes, is ideal for use in education & student laboratories.

- **Standard Size**

Microscope Slides-(1"x3")25.4mm x 76.2mm | Cover Glass-(7/8"x7/8")22mm x 22mm

- **Quality Material**

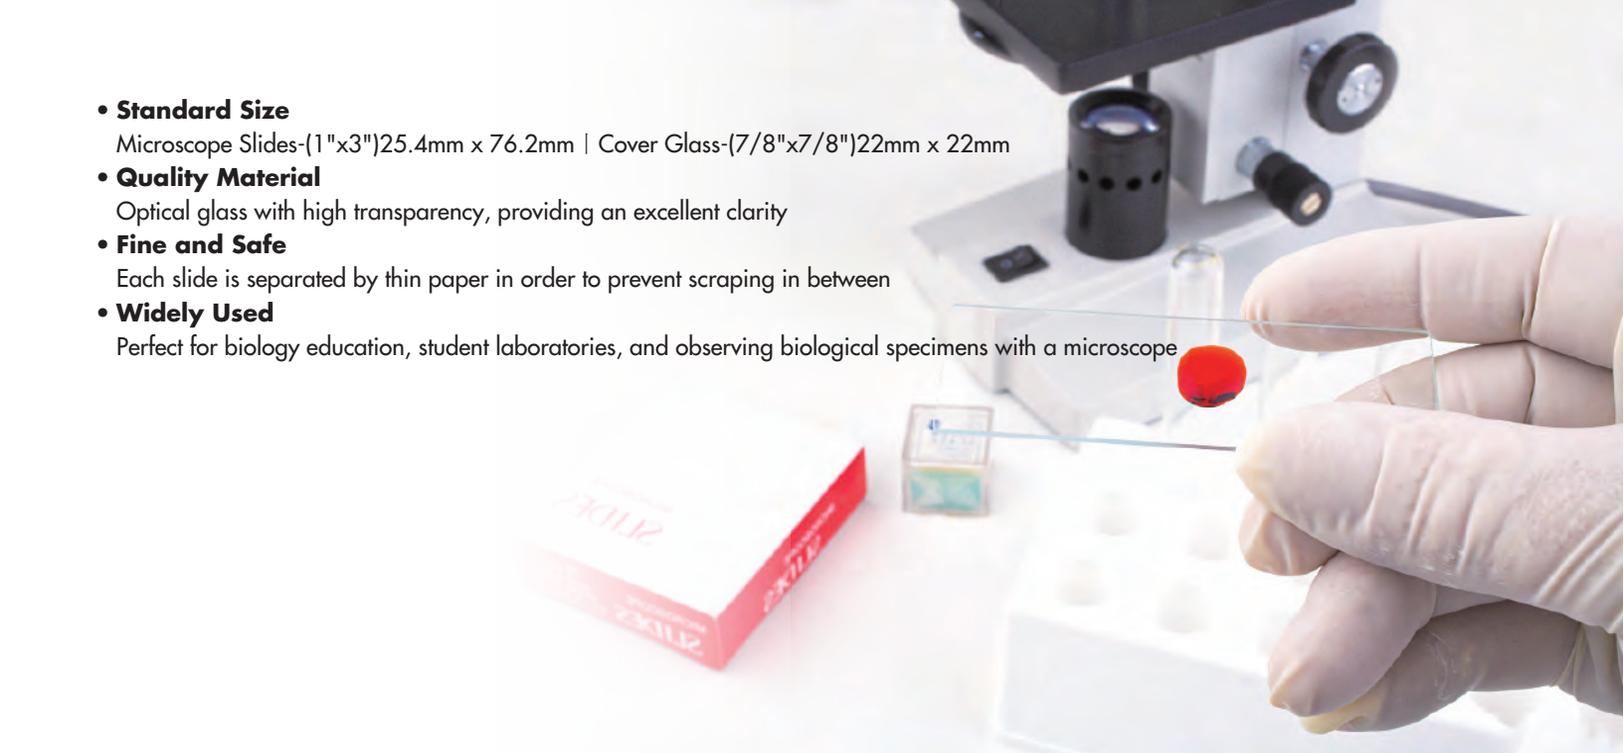

Optical glass with high transparency, providing an excellent clarity

- **Fine and Safe**

Each slide is separated by thin paper in order to prevent scraping in between

- **Widely Used**

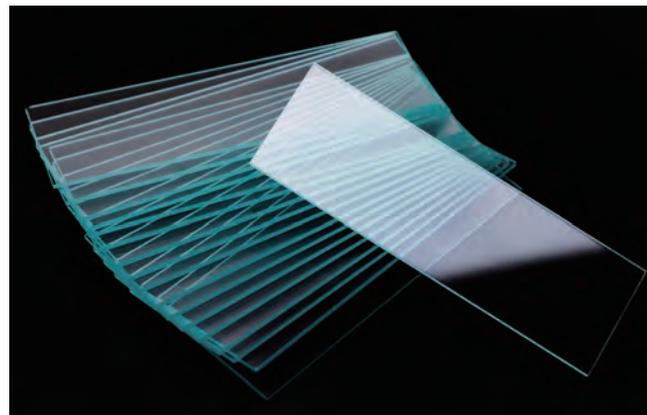

Perfect for biology education, student laboratories, and observing biological specimens with a microscope
